

Bottom Fork News

Jerry Montgomery closed his class last Monday at our school with a picture show. The farmers, who attended were very sorry to see it close, as they have profited by the good instructions he gave them.

The members of his class have bought 15 bags of certified potato seed and fertilizer.

The miners of the community are not working very much and the weather is too bad for farming.

Bennett Sparks killed some of the finest hogs in the community.

Paul the son of W. H. Adams and a high school student of Whitesburg has built a fine brooder house and bought 210 baby chicks. When it comes to raising chickens, ole Paul is on the spot.

Mrs. Sink Spangler is still very ill at the home of her daughter.

Eva Mae Webb spent the week

end with Florence Hale of Whitesburg.

J. Marion Blair conducted a nice evening service at the home of Mr. and Mrs. Dixon Craft. The aged couple are in the best of health.

Ruby and Virginia Craft visited Mr. and Mrs. Jim Page over the weekend.

Lois Webb is spending a few days in Whitesburg.

Ruth Adams, who is employed at Whitesburg, spent the weekend at home.

Lower Rockhouse News

Several cases were heard in Squire W. Hampton's court, last Saturday and a good crowd attended to see the procedure of the cases, they had heard of.

Castle Caudill moved from his home on Spring Branch to the property of his father-in-law, Mr. Damon Dixon. Mr. Caudill moved Saturday and is planning on staying for some time at the new home.

Miss Gracie Bach is much better at this time, she has been suffering with nervousness for some time.

Last Friday morning, workmen saw an astronomical phenomenon. Two men from Linefork and two from Jeremiah saw the stars falling as rain. They say that the stars seemed to be falling from the outer space through the stratosphere, into the atmosphere and on to the earth. Only one other similar occurrence was ever heard of by the writer and was before the turn of the century.

Sol Caudill has moved into the property of Grant Blair on Doty Creek. The family consists of a large number of able and willing workers and will till most of the Grant Blair farm.

John Quincy and Mose Adams were thrown into the creek near the mouth of Adams Branch when a young horse they were attempting to ride failed to carry two across the stream. The horse reared and plunged backward throwing the boys into the water. Neither of the boys were injured.

Blair Branch Adult School News

Mr. and Mrs. John Q. Adams and family visited the parents of Mr. Adams, this past weekend.

The Adults organized last Friday night and tried Fred Blair, charged with drunkenness. The mock trials are very interesting and educational. Persons that have been tried, say that there have been times when the accused becomes very excited. The verdict in the case of Friday night was not guilty.

Mose Adams walks a distance of approximately eight miles each night to attend our classes. When asked why he did it he replied, "I just like it."

Some criticism has been heard that might be termed, destructive the answer to such criticism is, The Blair Branch Adult School tries to aid anyone on any subject or problem referred to some source, where they could possibly find what they wished to know. We try to satisfy everyone that attends the classes.

Our neighbor Adult Teacher, Mr. Howard Canfield visited friends in our community last Saturday.

James Breeding attended the classes and enjoyed the evening with us Monday.

Radio, Photocells and 'Quakes' Aid Unceasing Search for Oil

By J. F. Witkowski, Principal, School of Radio, International Correspondence Schools

TO maintain our present reserve of crude petroleum, oil producers are faced with the necessity of discovering each year new deposits of oil capable of producing a billion barrels of crude. To meet this demand upon them, producers are engaged in constant exploratory work throughout ever-widening areas within our borders.

After a promising formation has been discovered it must be tested by drilling before its potentialities can be known, but such drilling is extremely costly. It is essential therefore, that before any drilling is undertaken all possible information about the sub-surface structures be obtained. In securing this information radio, the photoelectric cell, and miniature, artificial earth quakes caused by the explosion of dynamite play a part.

Dynamite is buried 20 to 50 feet underground at strategic points about the area being studied. At the same time that the dynamite is exploded a radio signal is transmitted, providing an exact record of the time of the explosion. From the data recorded by a seismograph, essentially the same instrument as

that used to record nature's earthquakes—it is possible to determine the speed at which the man-made earthquake or seismic waves travel through the various underground strata. From this in turn it is possible to learn a great deal about the character of the sub-surface formations and whether they are of a type likely to produce oil.

The photoelectric cell enters in through the development of a new instrument known as a seismograph which differs from a seismograph in several respects. Earth vibrations caused by the explosions are transformed into electric waves and are sorted out and transferred on a strip of motion picture film by a photoelectric analyzer. By this method it is possible to identify and use certain data that would otherwise be unrecognizable.

The seismographic method of oil exploration has been carried on in the United States since 1923. The buried wealth it has helped to reveal runs into the thousands of millions of dollars. Its record in the past and the promise it offers for the future gives it a unique position in the history of petroleum exploration.

THE GARDEN

By JOHN S. GARDNER, Kentucky College of Agriculture

Potato planting time is coming apace. As for that, some more venturesome gardeners have already planted their crops, though whether they will profit from their haste is problematical. In the latitude of Lexington, the right time lies between March 15 and April 10. In the extreme south portion of the state, the time is a week or 10 days earlier and in the northern counties, a week later.

Potato land should be of the best. It should be deep and mellow, well enough drained not to stand in water but not subject to becoming excessively dry, either. To help it meet either condition it should contain humus or rotted down vegetable matter in large amount.

The best humus material is a stable manure, but unless it is well rotted particularly if horse manure, it may cause potato scab trouble. Other materials are grass or clover seed, straw, tree leaves, weeds or a "green manure crop" sown especially to turn under. Except for the last named, it is best to break the land in use previous fall to give the plow under matter time to rot, at least partly. The green manure, rye or wheat, or best of all barley grown through the winter, should be turned under in the spring, six weeks before potato planting, if possible.

Potato land should be broken deep for the deeper the plowing the greater the moisture reservoir. A six inch depth is perhaps a maximum, breaking with horses, and, if the custom has been to break a lesser depth, each year an inch should be gained until that depth is reached.

Before turning the land, it is well to cut fine with a disk any growth or any materials just named, so that rotting may proceed specially, so unrotted they may make the land "drouthy" especially in seasons of scant rainfall.

A most important item in successful potato growing is using good seed. Roughly, there are two kinds certified and common, so-called "select." The former is standard always but the latter may be extremely variable. Sometimes, "select" seed potatoes are merely table potatoes, though somewhat more uniform in shape and size, perhaps. Sometimes "select" seed is a mixture of several varieties that conform generally to one shape. If seed of that sort is used with some of the varieties unsuited to Kentucky's climate and to the season, the results may be extremely disappointing.

The way to be safe is to use only certified seed, guaranteed all to be of the variety named on the tag to contain less than 5 percent of the "running out" diseases that cause low yields, and to show less than

5 percent of either scab and black. To make sure, however, that the certifying agency is reputable: a State College of Agriculture, a State Department of Agriculture, or a State Seed Commission. Also the name and address of the grower is given, for producers of genuine certified seed potatoes are proud to stand behind their product.

Slaney Brothers, Livingston county, have good prospects for the sale at top prices of 30 early spring lambs. William Slusher, Bell County, held a meat cutting and curing demonstration when he slaughtered two hogs.

Dunham News

Mr. A. C. Wheeler of Salyersville, Kentucky spent the weekend with his sister Mrs. B. W. Whitaker.

Mr. and Mrs. Bob Collins of Van Lear spent Sunday with Mr. and Mrs. Wade Collins.

Mr. and Mrs. Bob Whitney are announcing the marriage of their daughter, Margaret to Mike West, at Burdine, February 5, 1933.

Mr. and Mrs. Bert White spent the week end in Kingsport, Tenn.

Mr. and Mrs. Dee Childers are moving to McRoberts.

Leonard and Millard Vaughn visited relatives in the Jenkins Hospital last week.

Mr. and Mrs. W. B. Day of McRoberts visited their daughter, Mrs. Hubert Fuller, Sunday.

A series of meetings are being held here at the Baptist Church.

At the same time they organized a sheep protective association, Henry County farmers planned to raise more and better sheep.

Athel Tibbs, of Carlisle county, bought two registered bulls recently.

Claud Young, Bath County, is steadily improving his Jersey herd.

IN THE PAST

History — Daring Deeds — Exciting Accidents

Years ago, when the mountains and several of the valleys of this county were covered with virgin forest, a system of water logging was used. Huge rafts of logs went out of the mountains during the spring. John Fox, Jr. wrote of those rafts in the "Little Shepherd of the King Come", but later the rafting was proven unprofitable in the more remote and gorges creeks and single log floating became necessary.

A system of dams were placed in the Rockhouse and were used to supply enough water to carry the huge logs. At that time the water in Rockhouse divided where Blair Branch Bridge is now located and united again just above Adams Branch. This formed quite an island between the divided waters. (The land is still known as the Isles). Just where the waters united was a ford named for Moses Adams, the Moses Adams ford.

A dam was built there to raise the water level above the island. This particular dam failed to operate successfully, for when the trigger was sprung the logs drifted and jammed causing the middle pier to give away. The remains of this old dam has just vanished within the last decade and with it the ford, the islands and the name "The old splash dam."

In the late nineties Timber Bosses hired a special crew to float rafts or run logs in the streams. This was a very dangerous task and usually only those who could swim would attempt the dangerous task.

A rafting crew started on a journey one day and when they were only a few hours on their way, the raft began to weaken. When the floating mass passed under a sycamore tree with drooping boughs one of the crew caught a branch of the tree and after his strength was exhausted dropped down at the roots of the tree. Meanwhile the raft and crew had gone on down stream leaving the man stranded on a small island to choose his destiny. A few minutes later a running crew came down along the shore shoving the lodged logs into the stream. One of the crew volunteered to swim the river and aid the victim of the tide.

When he reached the island he found the man could not swim. Only one thing was to be done—the rescuer threw the man into the floating mass of logs and yelled "Swim!" and to the amazement of both the man did swim to safety.

EASY ON YOUR POCKETBOOK

...Easy on You

There's dollars and sense in taking the L. & N. instead of your car. No other form of transportation offers when they're only a few hours on their way, the raft began to weaken. When the floating mass passed under a sycamore tree with drooping boughs one of the crew caught a branch of the tree and after his strength was exhausted dropped down at the roots of the tree. Meanwhile the raft and crew had gone on down stream leaving the man stranded on a small island to choose his destiny. A few minutes later a running crew came down along the shore shoving the lodged logs into the stream. One of the crew volunteered to swim the river and aid the victim of the tide.

DOLLS—OLD AND NEW

Nothing has changed more in our lifetime than dolls. The rag doll, still found, does not have the importance it formerly had. It used to be the badge of every small child, boy or girl. Frequently it was nearly as large as the little toddler who dragged it around all day and took it to bed with him at night. From rather rough treatment it soon became a sorry-looking spectacle, with grease and dirt all over it. One little girl that I knew fed her doll a sausage, leaving ever afterward a round, greasy smear the shape of the sausage. The china-headed dolls we used to play with were made by people who apparently knew nothing about anatomy, for they were exceedingly stouter and shapelier. I strongly suspect the same people as the authors of the slatty figures in most fashion plates. The bodies of these dolls were stuffed with sawdust; hence the modest expression about having a pain in one's sawdust after a heavy Christmas dinner. Too rough treatment often destroyed the happiness, such as it was, of these dolls, for the sawdust soaked away and could not be replaced very skillfully. We dressed our dolls as children still do, with plenty of interest but with very little skill. I once owned a doll that I dressed as a boy, though it had the same lame expression of sexlessness that other dolls had, a blank stare that may have betokened more sense than that of the human beings that devised it. Sometimes there were dolls that were slightly different and much more expensive, dolls that older sisters or mothers had dressed up in clothes of another day and generation. These were lovingly kept hidden in a trunk or a chest of drawers, sacred relics of other days. Queer old buttons, odd styles of dresses and coats, even queer shoes—all these made the old-fashioned doll a source of wonder to younger brothers and sisters who could not recall the days when these same things were the latest style for Big Sister or Mother.

Changes have come rapidly in the styles of dolls and other toys. I suspect that the teddy bear has done more than any other toy to bring about this change. A great toy manufacturer told me that his company would make only a few of any type

haunted dropped down at the roots of the tree. Meanwhile the raft and crew had gone on down stream leaving the man stranded on a small island to choose his destiny. A few minutes later a running crew came down along the shore shoving the lodged logs into the stream. One of the crew volunteered to swim the river and aid the victim of the tide. When he reached the island he found the man could not swim. Only one thing was to be done—the rescuer threw the man into the floating mass of logs and yelled "Swim!" and to the amazement of both the man did swim to safety.

When he reached the island he found the man could not swim. Only one thing was to be done—the rescuer threw the man into the floating mass of logs and yelled "Swim!" and to the amazement of both the man did swim to safety.

of toy at first and then try them out on children. If a majority of the little fellows took them to bed at night, similar toys would be run off by the millions. This same man said that his company had made several millions of the monkey that climbs a string, the most consistently popular single toy ever made.

I suppose that my old likes and dislikes are unchangeable, but many of the modern toys seem hideous, ugly and unnecessarily so. Some of the toys are beautiful and artistic, but why should there be also these ugly, nightmarish things that one would hate to meet in the woods at twilight? I see no reason why babies should be forced to live among ugly things when beauty is everywhere about us and, as you would expect me as a Scotchman to say, equally cheap. The most exquisite trains and cars and dolls are exhibited on the same counter with other things that look like the dreams of a victim of delirium tremens. Baby dolls, pretty as pictures, are often sold by side with others that look like patients that have escaped from the psychopathic ward. Our old toys were not so pretty and may have been dumb-looking, but at least they were not deliberately made hideous.

No less than 3,000 tons of rock will be crushed in 1938 by Gallatin county farmers, according to plans. An increase of 75 pounds of butter fat per cow during 1938 over previous records was noted in dairy herds. Caldwell County, Ky., fired tobacco brought 7 cents more per pound than unfired for Tom Dunlap, a Grant county farmer. In Christian county, the Kivani club is offering \$25 for the best essay by a student on rural electrification.

Local organizations sponsored the baby beef project for Grayson county 4-H club members, who have 45 steers on feed.

DRY FEED DEVELOPS PROFITABLE CALVES; CHEAPER THAN MILK

Gray Summit, Mo.—When milk sells for a good price the average dairymen is up against it. He wants calves, and he wants cash. The average cost of milk-feeding a calf to six months frequently represents one-half or more of the total cost of raising a heifer to freshening age. High milk cost is an important item. But more important is the fact that calves fed on milk develop beefiness instead of the size and strength of bodies so essential to heavy milking cows.

Milk is Expensive Feed
One noted dairy specialist estimates that a milk-fed baby calf from birth up to four months consumes 200 gallons of milk. Two hundred gallons of milk at an average price of twenty cents a gallon makes the cost of raising a milk-fed calf up to four months, forty dollars.

"Too much money," say dairymen. Not many can afford to spend forty dollars to build a four-month calf. Such high costs at the start cut down the margin of profit later when the animal goes into the milking barn. And, from a point of nutrition, the calf fed on milk alone does not get all the things it needs for building the profit-making body of a milkster.

Calves Need Solid Matter
Milk is 87 percent water. Consequently, after the first few weeks baby calves fed on milk alone do not get solid matter enough to meet their needs. Heifers that start up on the profit side of the ledger are those that are grown up well during the first six months and kept on a complete and balanced ration of feed up to the time they freshen.

A simple plan of getting away from excessive cost of milk feeding baby calves fed on milk alone do not get solid matter enough to meet their needs. Heifers that start up on the profit side of the ledger are those that are grown up well during the first six months and kept on a complete and balanced ration of feed up to the time they freshen.

With Dams 3 Days
Calves at the Purina Experimental Farm are left with their dams only

Administration Building Stuart Robinson School

Accredited "A" Grade. For further information write or see—
W. L. Cooper, Superintendent,

Stuart Robinson School
Paye Rogers, who finished her high school work last week, has gone to her home at Partridge. She plans to return to Stuart Robinson for the graduation exercises on May 17.

Misses Sallie McCrory and Eunice Caldwell were dinner guests of Mrs. Arnold Asher Saturday, and spent the time in this hospitable home most pleasantly.

Rev. John R. Clarke, Jr. of Lees College, Jackson, filled the pulpit of the Doernman Memorial Presbyterian Church at Blackey, Sunday morning and also held the Sunday night service in the Stuart Robinson chapel. Mr. Clarke was the guest of the school while here and we enjoyed having him with us very much.

Miss Tillie McPheeters has been ill with flu for a few days, but is able to be out again. During her illness, Miss Mildred Thompson, assistant matron, had charge of the Girls Dormitory.

Mr. and Mrs. J. M. Phillips were recent victims of flu, and were obliged to miss a few days from work.

Rev. W. L. Cooper is spending this week in Louisville.

Our faculty and students are looking forward to the Tournament of the Arts, which begin Thursday afternoon of this week and lasts until Monday morning.

Ira A. Duff, Perry county is having his farm drained and a water storage pond dug.

By pooling their orders, Magoffin county farmers bought 5,000 lbs. of grass seeds at reduced rates.

Mrs. West Honored With Shower At Dunham
Mrs. Alex Varson entertained Saturday with a lovely shower honoring her niece, Margaret Whitney West, a recent bride. Mrs. West received many beautiful and useful gifts. After she had thanked the donors in her charming and graceful way, the guests were entertained with several games of Bingo. Prizes were given to Mrs. L. Vaughn and Mrs. F. Wenis.

Delightful refreshments were served to the following guests, Mesdames: Leonard Vaughn, Wade Collins, Joe Brown, Joe Varson, Jim Davis, Taylor Schockey, Kenneth Hughes, Green Conley, Bob Kyle, Felix Wenis, Misses Edna Whitaker, Frayle Long, Ellen Whitney, Velma Varson, Ruth Hughes, Grace and Eloise Schockey.

Severe functional pains of menstruation, cramping spells and haggard nerves soon rob a woman of her natural, youthful freshness. PAIN lines in a woman's face too often grow into AGE lines! Thousands of women have found it helpful to take Cardul. They say it seemed to ease their pains, and they noticed an increase in their appetites and finally a strengthened resistance to the discomfort of monthly periods.

Try Cardul. Of course if it doesn't help you, see your doctor.

Yields Increase In Trigg County

Trigg county farmers using limestone and superphosphate on their land last year harvested increased yields, according to County Agent Thomas W. Morgan.

Fifty-six farmers applying limestone and phosphate in growing red clover obtained increases averaging 4,850 pounds to the acre. Yields of alfalfa have jumped an average of 2,700 pounds to the acre on 25 farms where the effects of limestone and phosphate were tested.

Approximately 1,000 farmers in the county sowed a total of 200,000 pounds of korean lespedeza seed in 1937. Thirty-one men who cooperated with the county agent in demonstrating the value of limestone and superphosphate in growing lespedeza obtained average increases of 2,900 pounds of hay to the acre. Large increases were made in cover crops, the acreage of crimson clover being 70 percent more than in 1936.

I USED TO SUFFER THE SAME WAY UNTIL I FOUND QUICK RELIEF IN AN ANTI-PAIN PILL

ANTI-PAIN PILLS BEYOND QUESTION RELIEVE—BUT DON'T CAUSE INDIGESTION

DR. MILLER'S ANTI-PAIN PILLS

Did you ever take a medicine to stop headache and have the headache stop and a stomach ache start?

We'll wager you didn't take an Anti-Pain Pill. Anti-Pain Pills don't upset the stomach. They take effect quickly too—and they taste like watermelon wafers.

You can't do good work—you can't have a good time when you are suffering from:

- Neuralgia
- Headache
- Muscular or Periodic pains

Why don't you try the Anti-Pain Pill way to relief? Why believe you will be delighted with the results. Thousands of others are.

It will not cost much. Anti-Pain Pills sell for one cent each. (Keep in Economy Package) and will usually relieve.

Get Anti-Pain Pills at your Drug Store. Regular price, 25 for 25c. Economy pack, 125 for \$1.00.

BUY A MODERN CAR NOW—WHILE YOU HAVE MORE TO TRADE AND LESS TO PAY

NATIONAL USED CAR EXCHANGE WEEK

MARCH 5 TO MARCH 12

SEE ANY CAR DEALER DISPLAYING THIS SIGN

Get there early while the choice is wide—fine cars now offered at rock-bottom prices

This National Used Car Exchange Week gives you a great opportunity to OWN A BETTER CAR for a small investment. Automobile dealers co-operating in this big sale have a fine selection of used cars—and prices are far below those of several months ago.

Many are 1937, '36 and '35 models—backed by the finest of dealer guarantees. All have thousands of miles of first-class unused transportation in them.

And the "first-class" transportation of these modern cars represents satisfaction which the owners of older cars can hardly imagine. Beautiful, modern styling—a more comfortable ride—a more room for you and your luggage—finer,

more powerful engines—better gas mileage—better brakes—bigger tires—dozens of improvements introduced since your old car was built.

Now's the time to make the switch, while you have more to trade and less to pay. Your present car may cover the down-payment—balance on easy terms. If you have no car to trade, you can still take advantage of the low down-payments and easy terms during this sale.

Favorite Recipe of the Week

For Winter Meals.

SCALLOPED dishes are favorites for cold weather because it is a pleasure to use the oven, and because the blended flavor of tomatoes complements most any meat that is being served, and while there are almost unlimited ways of making the dish, you may enjoy trying the following recipe:

Scalloped Tomatoes.
1 No. 2½ can tomatoes
1 cup, minced onion 4 cups butter
1 tsp. salt
Combine the tomatoes with the onion and arrange a layer in a baking dish. Mix the salt and sugar with the bread crumbs and blend with melted butter. Place a layer of crumbs over the tomatoes, add another layer of tomatoes, crumbs, and so on until the dish is filled and ingredients used. Leave crumbs on top. Bake about 30 minutes in a moderate oven (350 degrees).
If you happen to have some sweet cucumber pickles on hand, slice two or three and add them to the above ingredients.

MARJORIE H. BLACK.

On the Highway

Probably the worst fault in driving a car is believing you haven't any fault.

The dullest drivers usually have the brightest headlights. Many a woman thinks she can drive as well as a man, and too often, it's the sad truth.

It isn't so funny to be a crazy driver as it is to be a funny driver.

Less automobile horn blowing—and more responsibility. Kisses may shorten life, says a physician. Especially when you snatch them while driving a car.

WHEN COLDS BRING SORE THROAT

Relieves THROAT PAIN RAHWESS

Enters Body through Stomach and Intestines to Ease Pain

The speed with which Bayer tablets act in relieving the distressing symptoms of colds and accompanying sore throat is attested by the fact that the treatment is simple and pleasant. This is all you do. Crush and dissolve three genuine Bayer Aspirin tablets in one-third glass of water. Then gargle with this mixture twice, holding your head well back.

This medicinal gargle will act almost like a local anesthetic on the sore, irritated membrane of your throat. Pain ceases promptly; rawness is relieved.

You will say it is remarkable. And the few cents it costs effects a lasting saving over expensive "throat gargles" and strong medicines. And when you buy, see that you get genuine BAYER ASPIRIN.

15¢ FOR 12 TABLETS

It is a magic carpet that will carry you to any part of the world in a few minutes. It is a magic carpet that will carry you to any part of the world in a few minutes.

Historic Hoaxes

By ELMO SCOTT WATSON
© Western Newspaper Union.

The Gold Machine

ALCHEMY, the professed art of transmuting baser metals into gold, has been one of man's dreams for ages. But it remained for a Connecticut Yankee to give it a practical application which, metaphorically speaking, lined his pockets with \$200,000 worth of gold obtained from credulous investors in his "gold accumulator."

This was the invention of Prescott Ford Jerneen, once a minister of Middletown, Conn., who interested Arthur W. Ryan, a jeweler, in his plan for extracting gold from sea water. In February, 1897, Jerneen lowered into Narragansett bay in Rhode Island, his "gold accumulator," a flat box containing a small battery, quicksilver, and other chemicals and constructed so that the sea water flowed over the quicksilver. When the box was raised 24 hours later what appeared to be gold was discovered in place of the quicksilver and the jeweler's tests proved to his satisfaction that it was real gold—\$2 worth.

So he joined with Jerneen in forming a company and selling \$500,000 in stock. A plant was built at Lubec, Maine, and the two "accumulators" began bringing up increasing amounts of gold. This went on for more than a year. Then in July, 1898, Jerneen went to Europe and at the same time an employee named Charles E. Fisher disappeared. The "accumulators" ceased to produce gold, for the very good reason that Fisher, who was a professional diver, had been placing the precious metal in them before they were brought to the surface.

When the fraud was exposed, the directors of the company who had been victims of the hoax, gave back the profits they had made and eventually the stockholders recovered about 36 per cent of their investment. There was some talk of trying to extradite Jerneen from Europe, where he was living off the \$200,000 he had obtained from investors, but nothing ever came of it.

Nature Faker Par Excellence
THE modern champion of all writers of nature fakes was undoubtedly "Lester Green," of Prospect, Conn. No matter how preposterous his yarns, which several metropolitan newspapers printed for the amusement of their readers, there have always been a great number of people who have believed them.

When he told how a setting of hen's eggs, which he had found in a block of ice taken from a flooded meadow, hatched out chickens covered with fur instead of feathers, a Canadian farmer wrote to him and wanted to buy some.

When he declared he had discovered the fluid responsible for the curl in pigs' tails and his wife had obtained beautiful permanent waves by rubbing it on her hair, "Mrs. Green" was flooded with requests from women for samples of this magic fluid.

When he told of spraying his apple trees with glue, which not only prevented the apples from falling but also preserved them in a fresh condition on the trees throughout the winter, both American and Canadian glue manufacturers wrote to ask what kind of glue he used, hoping to get a good "testimonial."

One Boston firm even sent a representative to Prospect to investigate his stunt.

And these are only a very few of the marvelous achievements of "Lester Green" who was, by the way, the brain child of C. Louis Mortenson, Prospect correspondent for the Waterbury (Conn.) Republican-American.

Spectator Poetry
DURING the second decade of the present century there was a sudden growth of new "schools" of poetry and art, among them such cults as Futurism, Vorticism, Cubism, Dadaism and Polyphonic Prose.

So in 1916 when the publication of "Spectra: a Book of Poetic Experiments" was announced, it was hailed with delight by the "emancipated souls" who were struggling for new methods of self-expression. The authors of this volume were "Anne Knish" and "Emanuel Morgan" and immediately they had a host of imitators who wrote the new Spectral poetry. Nobody could understand it, of course, but that made it seem all the more important.

Then the whole movement was revealed as a hoax which had been fathered by two authentic poets, Witter Bynner and Arthur Davidson Ficke, who used this method to satirize the current fad in poetic cults. But, in a sense, the joke was on them. For those who had been duped and had become devotees of "Spectrism" insisted upon continuing to write their verses in the "Spectral" style and to perpetuate the new "movement," which still flourished among some of America's intelligentsia.

Borax From Chile
From Lake Atacama, in Chile, 15,000 feet above sea level, is obtained half the world's supply of borax.

Three Frocks—a Wardrobe

IF YOU want to be all set for a 38, 40, 42, 44 and 46. Size 36 requires 5½ yards of 39-inch fabric. For collar in contrast ¾ yard. Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each. © Bell Syndicate.—WNU Service.

Trim and Tailored. This is the favorite silhouette for Spring. The make with kick pleat back and front is to wear, very comfortable for walking and going about your daily work. Note the yoke top and inverted pleat in back of bodice to permit perfect freedom. It is a grand spectator sports dress and will make up beautifully in silk crepe, rayon print or cotton fabric.

Princess for Morning. You'll feel sweet as sixteen in this pretty square-necked princess dress with fitted lines. The silhouette is molded and slim. Note the pretty sleeves, puffed high, to make the waistline look even smaller. Choose a pretty cotton print or one of the new rayons to make a dress as charming as the one shown. You'll find the pattern complete with sew chart telling you exactly how to proceed.

Fitted Lines for Afternoon. Look lovely and picturesque in this frock on molded lines with uplift at the waist and soft shirring in front of bodice. The roll collar and low V neckline is very slenderizing. You'll enjoy the good lines, the flattery of this dress and its grand wearability. Whether it is a luncheon for six or a dinner at eight, you'll be correctly dressed in this frock.

The Patterns. 1976 is designed for sizes 32, 34, 36, 38, 40, 42, 44, 46, 48 and 50. Size 34 requires 4¼ yards of 35-inch fabric. 1452 is designed for sizes 14, 16, 18, 20, 42, 44, 46 and 48. Size 16 requires 4¼ yards of 39-inch fabric. 1451 is designed for sizes 34, 36.

GREAT—GREAT—GREAT—GRANDCHILDREN

Pedigree Perry's Seeds are often developed and improved for six, eight, and even ten generations before they are sold. Year after year, at the unique Perry-Morse Seed-Breeding Institute, the best flower and vegetable plants are selected from each year's experimental crops and their seeds planted for still another improved generation. By this process, desirable characteristics are strengthened, weaknesses eliminated.

And Perry's Seeds must prove they will grow. So the Institute makes 50,000 tests for growing ability each year before packaging—and tests each variety for true-to-type!

Perry's Seeds have grown the finest flowers and vegetables in your locality for years. Assure your garden a perfect start this year—choose pedigreed and tested seeds from the Perry's Seeds display in your favorite store. See a packet and use 1938 NOVETTES tool. Perry-Morse Seed Co., Detroit, San Francisco.

To Prosper and Live
To live, to work, to help and to be helped, to learn sympathy through suffering, to learn faith by perplexity, to reach truth through wonder—behold! this is what it is to prosper, this is what it is to live.—Phillips Brooks.

CHEW LONG BILL NAVY TOBACCO 5¢

Aisle of Woman's Dreams

Suppose you knew that one aisle of one floor in one store had everything you needed to purchase!

Suppose that on that aisle you could buy household necessities, smart clothing, thrilling gifts for bride, graduate, youngster! How much walking that would save! How much time, trouble and fretful shopping you would be spared!

That, in effect, is what advertisements in this paper can do for you. They bring all the needs of your daily life into review in one convenient place. Shop from your easy-chair, with the advertisements. Keep abreast of bargains, instead of chasing them. Spend time in your newspaper to save time—and money—in the stores.

What's New in Radio?

By J. F. Witkowski
Principal, School of Radio,
International Correspondence Schools;
Associate Member,
Institute of Radio Engineers

Scientists of the Carnegie Institution are using radio to explore the stratosphere. Radio waves are sent out on various wave lengths to strike the different levels of the atmosphere and be reflected back to their source. It is believed that study of the characteristics of the reflected waves will aid in revealing such that remains unknown concerning the upper atmosphere.

The Bureau of Air Commerce is installing a series of radio-operated teletypewriters along the Washington, D. C. — Nashville route, to provide for the simultaneous radio transmission of weather reports to the different points along the route, while eliminating the possibility of error in the receipt of the reports. The installation follows experimental use of the machines between Washington and Baltimore, over a period of 18 months.

AN ORDINANCE providing for the annexation of certain territory to the present corporate limits of the City of Whitesburg.

The City Council of The City of Whitesburg, do ordain as follows: It appearing that it is in the best interests of the City of Whitesburg and the citizens thereof, and those residing and owning property within the hereinafter described property or tract of land, that said property be annexed to and embraced in the city limits or incorporated limits of said City.

The territory proposed to be annexed is described as follows: BEGINNING at the corporate limits of the City of Whitesburg at the railroad right-of-way near the tunnel in the eastern section of Whitesburg;

thence a northern course to the mouth of a drain on the Kentucky River at a rock 40 poles S. of the W. H. Caudill house at a point joining the L. & N. Railroad Company right-of-way; thence an eastern direction with said right-of-way to the line of a lot formerly owned by James Fairchild and now owned by Roy F. Lewis; thence with his line to the lower corner thereof, extending to the County road; thence with said road in a western direction to the corporate limits of the City of Whitesburg at the mouth of a drain and to the line of the property owned by James P. Lewis; which property line is near what is commonly known as the upper bridge in the eastern section of said City, so as to include all of the property now owned by W. H. Caudill and all the property located on the south side of the highway leading from Whitesburg in an eastern direction between the upper bridge and the corner of the lot now owned by Roy F. Lewis.

It is further ordained that this ordinance be advertised in at least 4 consecutive issues of The Mountain Eagle, a newspaper published in Whitesburg, Kentucky, and that copies of this ordinance be posted at public places in the City of Whitesburg and the territory herein proposed to be annexed, and this ordinance is laid over for a period of 30 days as required by law for such other proceedings as may be necessary to a final and complete passage of same as provided under section 9611 of Carroll's Kentucky Statutes.

All ordinances or parts of ordinances in conflict herewith are hereby repealed and the same shall be in full force and effect from and after its passage and publication as required by law.

This 1st day of March, 1938.
BILL COLLINS, Mayor.
Attest: J. L. HAYS, Clerk.

AN ORDINANCE declaring a public convenience and necessity for the improvement of Cornelia Avenue, Frazier Street, Kentucky Avenue, Letcher Street, Texas Street, and other

Streets in the City of Whitesburg, providing for the class of construction and material and plan for construction thereof and payment therefor.

The City Council of The City of Whitesburg Do Ordain as Follows:

That whereas, it is considered of public convenience and necessity and for the best interests of the citizens of Whitesburg, Kentucky and the citizens and residents living and residing and owning property on the streets hereinafter set out, and Whereas, the City Council of the City of Whitesburg has secured an allotment and appropriation in the sum of \$61,605 from the Works Progress Administration of the Federal Government, and known as Project No. 147-2103-1152, for the improvement of Cornelia Avenue, Frazier Street, Kentucky Avenue, Letcher Street, Texas Street, and other streets, and

Whereas, said streets can now be improved at a minimum cost to the owners of lots or parcels of land adjoining or abutting said streets, BE IT THEREFORE ORDAINED that the streets above mentioned be improved by grading, draining, and

the laying of a concrete surface thereon.

Said work to be done under the supervision of the Works Progress Administration and the officials of the City of Whitesburg, and according to the plans and specifications of R. E. Crawford, City Engineer, which plans and specifications have been and are now on file in the office of said City Engineer, subject to inspection, and in accordance with Section 9615-1, Carroll's Kentucky Statutes.

Notice is hereby given that the publication of this ordinance be and the same is hereby considered a legal notice in accordance with the laws of the State of Kentucky, made and provided for public improvement of this nature and of a City of this class.

When said work and improvement of the various streets hereinafter mentioned has been received, accepted and approved by the officials of the Works Progress Administration and the City Council of the City of Whitesburg and R. E. Crawford, Engineer, pursuant to this ordinance the cost thereof, less the amount appropriated and paid by the Works Progress Administration of the Fed-

eral Government, will be assessed against the abutting and adjacent property, by charging each owner of lots or parcels of land adjoining abutting or fronting said streets and the improvements thereon with their respective pro rata part of same according to the number of front feet owned by them.

Upon the completion and acceptance of said improvement as herein provided, the City Council may cause to be issued assessment warrants against the respective property owners which warrants shall be immediately due and payable and the payment of said warrant or warrants shall constitute a release of the state-

Attest: J. L. HAYS, Clerk.

utory lien incurred by said improvement.

In event any section or part of this ordinance shall be declared invalid the remainder thereof shall be construed to be in full force and effect.

This is the 1st day of February, 1938.
BILL COLLINS, Mayor
Attest: J. L. HAYS, Clerk.
